

# Instrument Rating Course

## **INSTRUMENT RATING COURSE**

Course Includes

- 20 hours dual instruction in Cessna 152
- 20 hours dual instruction in simulator
- 35 hours ground school
- 16 hours pre and post flight briefing books and training materials
- 1 hour in Cessna 152 for flight test
- Written and flight-test examination fees

Training for the Instrument Rating provides the skills necessary to fly in instrument meteorological conditions. Besides teaching you to fly “on the gauges,” instrument flight training will teach you to fly with precision in an increasingly complex air traffic system. Addition of the instrument rating will provide new usefulness and versatility to your license

## **Prerequisites**

- Private or Commercial Airplane certificate
- 100 hours of flight time as PIC including 50 hours of cross-country
- Current medical certificate
- Knowledge of Morse code
- Current FRT0 and COP/RT/R LICENCE

Completion of the course allows a pilot to operate an aircraft that is being flown by solo reference to instruments in actual instrument conditions and in positive control airspace.

instrument conditions and in positive control airspace.
