

Education—On The Wings Of Private Initiative

Economic liberalisation has set the tone for increasing participation of the private sector in professional education. Here is a look at some pioneers in the field from Hyderabad

THE field of aviation is one of the most challenging and choosing for a profession today. The national open sky policy and tremendous growth in the passenger and cargo transport the world over has opened a world of opportunity for the deserving high technology involved in today's aircraft and the future of space-related operations needs a true aviation professional for the safe operation of the multi-million dollar equipment carrying hundreds of people and valuable cargo across the continents.

According to the international Air Transport Association, 65 per cent of the world's airline pilots will retire during the next decade. There is an estimated requirement of over 200,000 pilots to fill the positions by the turn of this century.

Flytech Aviation Academy at Hyderabad, set up under the leadership of true aviation professionals involving experienced pilots and engineers who have served in reputed organisations worldwide, works towards creating the right ambience and atmosphere for producing the new breed of aviation professionals to serve the aviation industry worldwide, with the largest fleet of CESSNA 152 aircraft in the

sub-continent equipped with the latest avionics.

Pilot training programmes were developed by our collaborator, Phoenix East aviation, Florida, USA, which has trained thousands of pilots from all parts of the world for the past 25 years. These programmes combined with the exceptional Hyderabad climate, giving over 300 days of flying weather and terrain complex air space and excellent training facilities enable you to develop as a throughbred professional pilot in the booming aviation industry.

Mahaveer Golecha, managing director of Ivy League Academy, who says that, "the government should concentrate only on the lower income group and leave the middle and higher income group students to the residential and private educational institutions." He goes on to add that unless the parents are willing to pay for high standards of education, they will not obtain the same for their children. It is a vicious circle—how can you expect excellent standards when the fees are very low. The salaries for any good teacher are high, to pay them, the fees have to be on par. The standard of education is directly proportional to the salary of the teacher."

Flytech offers accelerated programs which means you can
